

ANTICIPATING FUTURE SKILLS

Professional, scientific and technical services

The professional, scientific and technical services industry engages in providing professional, scientific and technical services, and often requires a high level of expertise, training and formal qualifications. These services include scientific research, architecture, engineering, computer systems design, law, accountancy, advertising, market research, management and other consultancy, veterinary science and professional photography.

By 2027-28, it is projected* that there will be:

246,699 people employed in professional, scientific and technical services in Queensland

+18,609 additional people employed since 2023-24

By 2027-28, the four largest professional, scientific and technical services groups will be:
